

2010 Child Support Guideline Calculation Table Insert
(Posted August 10, 2010)

New guideline amounts provided in the 2010 Child Support Calculation Table reflect revisions made by the federal government to deductions for federal income and Federal Insurance Contribution Act (FICA) tax/Medicare withholdings for 2010.

Federal law also requires the federal Department of Health and Human Services update the poverty guidelines at least annually, adjusting them on the basis of the Consumer Price Index for All Urban Consumers (CPI-U). Based on the average CPI-U percentage change from calendar year 2008 to the period beginning with January 2009 and ending on May 31 2010, the guidelines for the remainder of 2010 showed no substantial change from the 2009 Poverty Guidelines.

Therefore, the self-support reserve for the remainder of 2010 will remain at \$903.00.
