Summary

This revision eliminates the E A-Z manual information that combines the cash assistance programs formerly known as Disability Lifeline with the Medical Care Services program that provided medical benefits to those receiving DL cash. Medical Care Services information is now separate and is contained in a number of new WACs effective 11/1/11 under Title 182. Clarifying information is being completed for these WACs and will be included in the manual in the next few days. WACS that formerly held information on Medical Care Services have been repealed and all new WACs for this program will be found under Title 182, in chapters above 500. Hyperlinks within the WACs are being corrected daily for these new changes.
